

IN THE ABSTRACT

Please amend the title in the Abstract at p. 10 as follows:

HIGH EFFICIENCY LED DRIVER SYSTEM AND METHOD FOR DRIVING LEDS

Please amend the abstract as follows:

Embodiments of the invention provide for ~~circuits~~ a system and method for driving LEDs with consistently good illumination and superior efficiency at lower cost and suitable for use with cheaper LEDs or with LEDs having wide component parameter tolerances over wide operating voltages and temperature variations. ~~Circuits disclosed may be, but need not be, embodied on a single semiconductor chip.~~
